Copyright Note

Copyright allows us to copy a maximum of two articles from any issue of a journal, unless it is a thematic issue, for any one individual.

We can only copy an article once for the same person. Please check to make sure you have not asked us for the article already.

Requesting Articles

If you would like to request any articles included in this bulletin, or to be put onto the bulletin’s distribution list, please contact Library and Knowledge Services at Grantham Hospital:

Tel: 01476 464321  E-mail: library.grantham@ulh.nhs.uk

Make just one stop for mental health guidance, news and library resources; visit the Mental Health Subject Collection.

We are currently looking at print journal renewals – if you have any suggestions for journals we could look at subscribing to please let us know as soon as possible.

Thank you
Selected Articles from LPFT’s Print Journals:

Alcohol and substance abuse

**Neurobiology of addiction: a neurocircuitry analysis**
This review covers mechanisms of binge/intoxication stage, withdrawal/negative effect stage, preoccupation/anticipation stage, molecular and genetic targets with in the brain circuits associated with addiction, developmental exposure as a key component of vulnerability for drug and alcohol use disorders, relevance to behavioural disorders, implication for medication development, conclusions and future directions.
Koob, G et al
Lancet Psychiatry 3 (8) 760-273 (186 references)

Bereavement

None this month

Child and Adolescent Issues

**Parenting style in childhood and mortality risk at older ages: a longitudinal cohort study**
Demakakos P et al
BJPsych 209 (2) 135-141 (43 references)

**Impact of childhood trauma on risk of relapse requiring psychiatric hospital admission for psychosis**
Petrol N et al
BJPsych 209 (2) 169-172 (5 references)

**Suicide in children and young people in England: a consecutive case series**
There is concern about a possible rise in suicidal behaviour in the under 20s. The article aims to establish how frequently suicide is preceded by child-specific and young person-specific suicide risk factors, as well as all-age factors, and to identify contact with health-care and social-services and justice agencies.
Radway, C et al
Lancet Psychiatry 3 (8) 751-758 (29 references)

**Risk factors for suicide in children and young people: common yet complex**
This is a comment on the article above
Saunders, K
Lancet Psychiatry 3 (8) 699-700 (10 references)

**EMDR therapy as a portal to a child’s processing of a medical condition: a case study and session deconstruction**
Klaff F
Jnl EMDR Practice and Research 10 (3)189-198 (7 references)

Dementia and Alzheimer’s disease
‘You’re looking well!’
Hairdressing is transforming the care of people with dementia, not just as a sensory and social experience but as a big boost to their self-esteem.
Trueland J
Nursing Standard 30 (45) 18-21

Malnutrition and dementia
Article looks how to manage malnutrition in a patient with dementia
Wilheim, K
Nursing Standard 30 (46) 64-65

‘Bringing respite in the burden of illness’ – dog-handlers experience of visiting older persons with dementia together with a therapy dog
Swall A et al
Journal of Clinical Nursing 25 (15 & 16) 2223-2231

The frontotemporal dementia-motor neuron disease continuum
The frontotemporal dementia-motor neuron disease is now recognised as an important dementia syndrome, which substantial challenges for diagnosis and management. This article looks at genetics, cellular models of the disease, pathology, clinical features, cognition and behaviour in motor neuron disease, imaging, diagnosis and management of the disease.
Burrell, J et al
Lancet 388 (10047) 919-931 (100 references)

Depression

Comparative efficacy and tolerability of antidepressants for major depressive disorders in children and adolescents: a network meta-analysis
This article looks at whether to use pharmacological interventions, which drugs should be preferred, and compares and ranks antidepressants and placebos
Cipriani, A et al
Lancet 388 (10047) 881-890 (30 references)

Antidepressants fail, but no cause for therapeutic gloom
This is a comment on the Cipriani article above.
Jureidini, J
Lancet 388 (10047) 845 (5 references)

Cost and outcome of Behavioural Activation versus Cognitive Behavioural Therapy for Depression (COBRA): a randomised, controlled, non-inferiority trial
This article compares CBT, which is complex and costly with the simpler BA, which might be as effective and cheaper.
Richards, D et al
Lancet 388 (10047) 871-880 (34 references)

Global dissemination and implementation of behavioural activation
This is a comment on the Richards article above.
Kanter, J et al
Lancet 388 (10047) 843-844 (14 references)
Disorders

Risk of dementia and death in community-dwelling older men with bipolar disorder
This article investigates the 13 year risk of dementia and death in older adults with bipolar disorder – a cohort study of 37768 men aged 65-86 years.
Almeida O et al
BJPsych 209 (2) 121-126  (43 references)

Spiers N et al
BJPsych 209 (2) 150-156  (55 references)

Pharmacological and psychotherapeutic interventions for management of obsessive-compulsive disorder in adults: a systematic review and network meta-analysis
This article compares all available treatments using both direct and indirect data.
Skapinakis, P et al
Lancet Psychiatry 3 (8) 730-739 (50 references)

The road to improvement in obsessive-compulsive disorder
This a comment on the article above.
Torres, A
Lancet Psychiatry 3 (8) 695-697 (12 references)

The relationship between attachment styles and childhood trauma: a transgenerational perspective – a controlled study of patients with psychiatric disorders
Ozcan N et al
Journal of Clinical Nursing 25 (15 & 16) 2357-2366

LGBT issues

Miscellaneous

Integrating mental and physical healthcare
Chesnaye, P
Nursing Times112 (32/33/34) 20-23 (30 references)
In this article...

- How mental and physical health are connected
- Outline of the rotational training programme
- Preliminary evaluation of the scheme
Using health psychology to help patients: promoting wellbeing
This article explores the relationship between wellbeing and health, and interventions to improve wellbeing.
Barley, E et al
British Journal of Nursing 25 (15) 852-855 (31 references)

Predictors of effective de-escalation in acute inpatient psychiatric settings
Lavelle M et al
Journal of Clinical Nursing 25 (15 & 16) 2180-2188

Professional

The Mental Capacity Act: a review of the current literature
Marshall, H et al
British Journal of Community Nursing 21 (8) 406-410 (32 references)

Schizophrenia

Evaluation of the validity and utility of a transdiagnostic psychoses dimension encompassing schizophrenia and bipolar disorder
In recent years the Kraepelinian dichotomy has been challenged in light of evidence on shared genetic and environmental factors for schizophrenia and bipolar disorder, but empirical efforts to identify a transdiagnostic phenotype of psychosis remain remarkably limited.
Reininghaus et al
BJPsych 209 (2) 107-113 (41 references)

Effects of first-generation antipsychotics versus second-generation antipsychotics on a quality of life in schizophrenia: a double-blind, randomised study
Effectiveness studies published in the last 10 years have not unequivocally confirmed the superiority of SGAs over FGAs. This article compares the quality of life of patients on a FGA strategy with those on SGA strategy.
Grunder et al
Lancet Psychiatry 3 (8) 717-727 (40 references)

Second generation antipsychotics and quality of life in schizophrenia
This is a comment on the article above.
Leucht, S et al
Lancet Psychiatry 3 (8) 694-695 (6 references)

Self-harm and Suicide

Psychological interventions following self-harm in adults: a systematic review and meta-analysis
Self-harm is common in young adults 15-35 and is associated with suicide. The article undertake a Cochrane review and meta-analysis of the effectiveness of psychosocial interventions for self-harm in adults
Hawton, K et al
Lancet Psychiatry 3 (8) 740-750 (60 references)
Psychological interventions to prevent repeated self-harm
This is a comment on the article above.
Wasserman, D
Lancet Psychiatry 3 (8) 697-698 (13 references)

Therapy

SPECIAL THEMED ISSUE: EMDR THERAPY AND PSYCHO-ONCOLOGY

This month’s issue of the Journal of EMDR Practice and Research is a special themed issue so you can request all of these articles if you wish:

Editorial – EMDR therapy and Psycho-Oncology
Maxfield Louise
Jnl EMDR Practice and Research 10 (3)135-137 (12 references)

EMDR therapy in Psycho-Oncology: a bridge between mind and body
Faretta E, Civilotti C
Jnl EMDR Practice and Research 10 (3)138-152 (146 references)

Neurobiological impact of EMDR in cancer
Carletto S, Pagani M
Jnl EMDR Practice and Research 10 (3)153-161 (77 references)

EMDR therapy protocol for Oncological patients
Faretta E, Borsato T
Jnl EMDR Practice and Research 10 (3)162-175 (48 references)

EMDR resource methods for women with breast cancer
Murray K
Jnl EMDR Practice and Research 10 (3)175-188 (50 references)

EMDR therapy as a portal to a child’s processing of a medical condition: a case study and session deconstruction
Klaff F
Jnl EMDR Practice and Research 10 (3)189-198 (7 references)

The EMDR integrative group treatment protocol for patients with cancer
Jarero I et al
Jnl EMDR Practice and Research 10 (3)199-207 (31 references)

Couple therapy when one spouse has cancer: integration of EMDR and relationship enhancement therapies
Moor M
Jnl EMDR Practice and Research 10 (3)208-214 (31 references)

EMDR and CBT: A comparative clinical study with oncological patients
Faretta E et al
Jnl EMDR Practice and Research 10 (3)215-227 (55 references)
